Delco Introduces COBALT™ Cold-Water Electric Pressure Washer

Elk Grove Village – August, 2008. Delco Cleaning Systems is proud to introduce the Cobalt™ Cold-Water Electric Pressure Washer. Built on a rugged steel frame, this Cobalt model is equipped with oversized rear pneumatic tires and sturdy front casters. The 220VAC motor powers the belt-driven pump to generate 3,000 PSI @ 3.0 GPM.

“The Cobalt delivers significant power at an affordable price,” noted Frank Rostine, Vice President of Delco. “We built this new model to be very price competitive in the market without compromising on power, performance, or durability.”

“While others are raising their prices, Delco is driving them down.”
