Delco Introduces ELIMINATOR Hot-Water Pressure Washer

Elk Grove Village – November, 2008. Delco Cleaning Systems is proud to introduce the ELIMINATOR Hot-Water Pressure Washer. The state-of-the-art design uses NG or LP to fuel the burner. The ELIMINATOR is ideal for permanent in-plant installation and operation. The Front Control Panel features a centralized location for all controls, an Hour Meter, 24 Volt Electrical Controls, and the Hinged Panel allows easy access to electronics & wiring.

Every ELMINATOR features BALDOR® Motors and GENERAL® Pumps. The Dual belt Drive System provides redundant power to the pump, and the Automatic System Shutdown promotes fuel conservation, shutting down the system after 4.5 minutes of inactivity. Also included are an Adjustable Auto-Stop Timer and a Downstream Chemical Injector. The ELIMINATOR Series ranges from 2000 PSI @ 4.0 GPM to 3000 PSI @ 5.0 GPM.
