Euro Line revitalizes Hot Water Pressure Washer Products

Elk Grove Village – April, 2007. Delco is pleased to announce the latest addition to their line of Hot-Water pressure washers – the Euro Line. These exceptional machines combine direct-drive electric motor/pump systems with diesel-fired burners in a stylish new package. Available in three different styles, the Euro Line is now available and in stock at all Delco Dealers in North America. Utilizing intuitive controls and operator-friendly dual lances, the Euro Line is easy to start-up and keep operating all day long. On-Board fuel and chemical tanks keep the unit clean and ready to run at a moment's notice. All feature heavy-duty air cooled motors, and industrial triplex plunger pumps.

John North, Vice President of Delco, stated "These are the machines our dealers and customer are demanding! No other product has been so well received as the new Euro Line among our growing dealer network."
