Monster Hose offers competitive alternative to Rubber Hose

Elk Grove Village – April, 2007. O.E.M. Industries, a division of the FNA Group, announced today the availability of their new Monster Hose. Monster Hose is a revolutionary Thermoplastic Hose, using a high-strength wire braiding and nylon braiding to achieve a true 4:1 burst ratio in this 4,000 PSI Hose. The Clear Coat outer jacket reveals the brass-coated steel overbraid, giving the entire hose a deep golden hue.

“This hose is a major step forward for OEM, and for domestic hose production,” noted Mr. John Pianetto, Vice President. “It combines the best features of a thermoplastic hose with the strength of wire-braiding, and a UV-resistant clear-coat jacket.”

Monster Hose is ideal for Cold-Water Pressure Washers (Gas or Electric Powered) as well as other cold-water applications, and is available in 5/16” and 3/8” diameters.
